

InterSwapX

SOLVING UX BY GRABBING THE BEST SWAPS

Team

Aman Raj

Worked with : Biconomy, CertiK

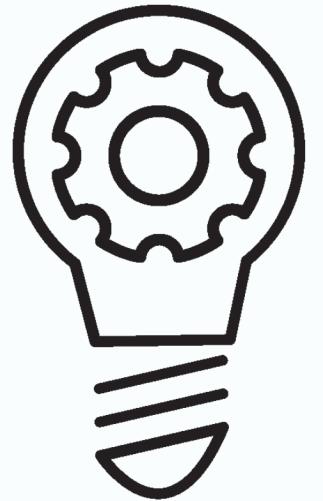

Aniket Dixit

Worked with: Umee, Tendermint

Arpit Srivastava

Worked with : CertiK, Polygon

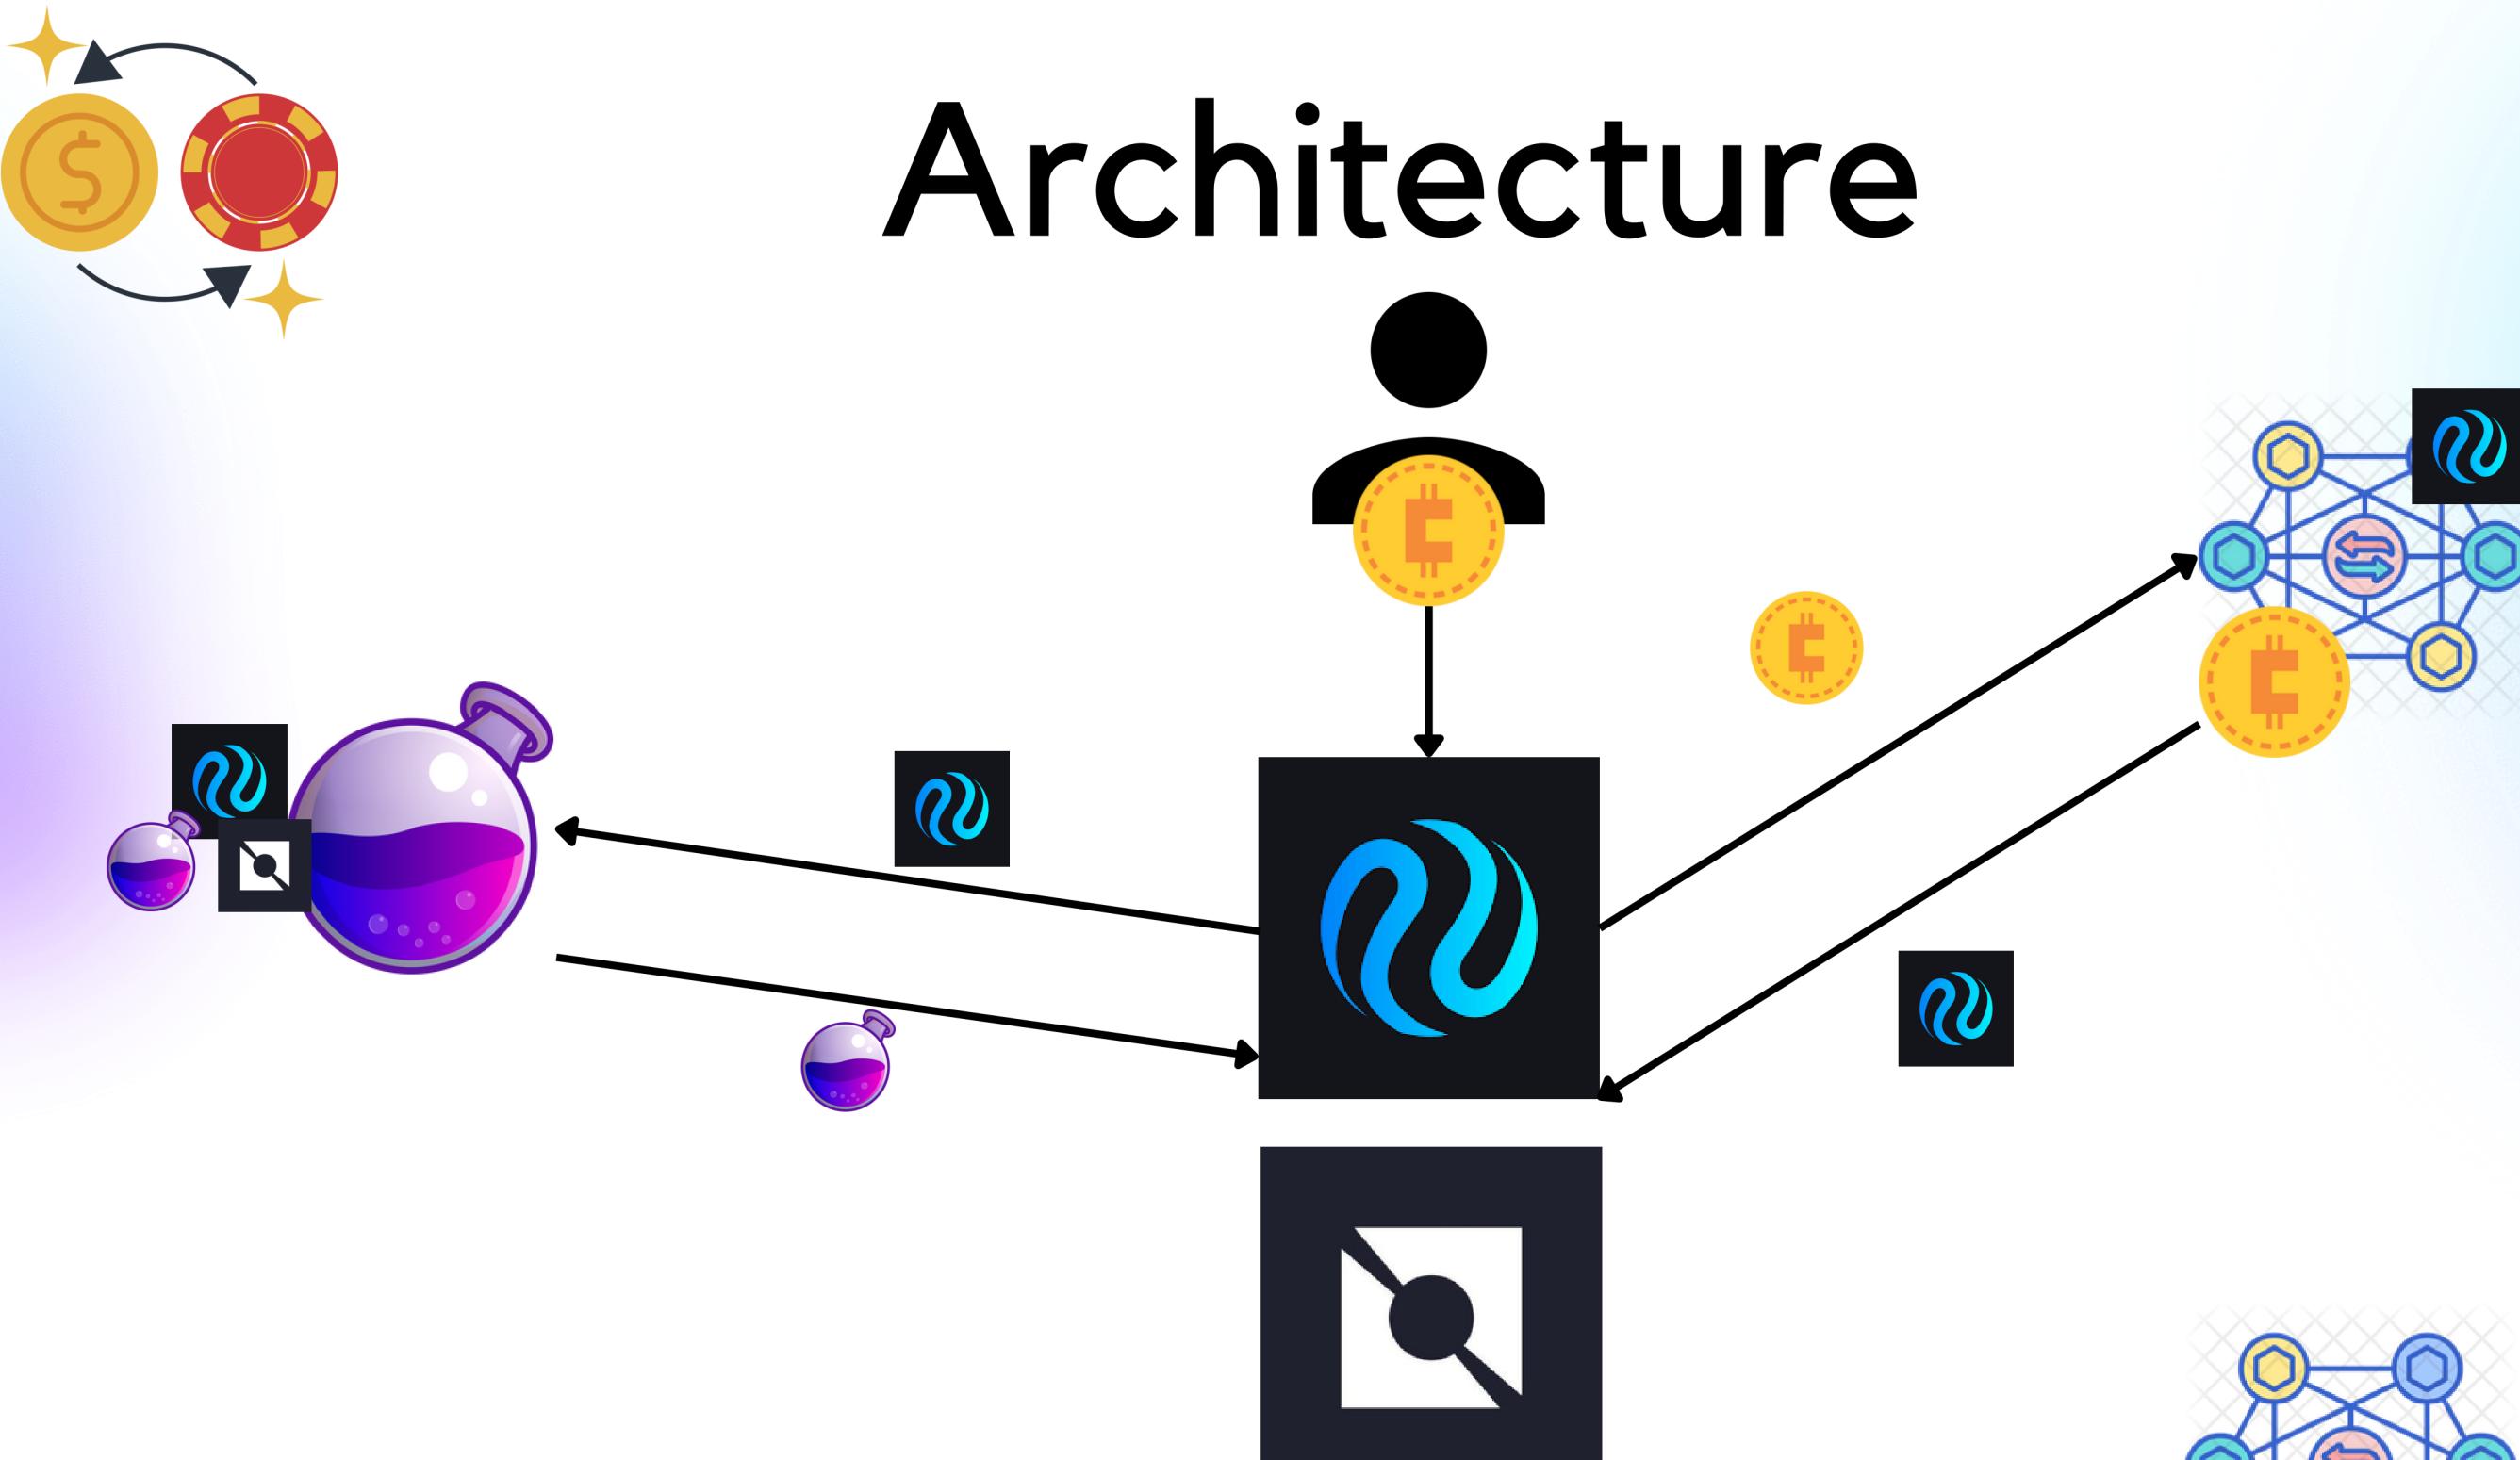

The Idea

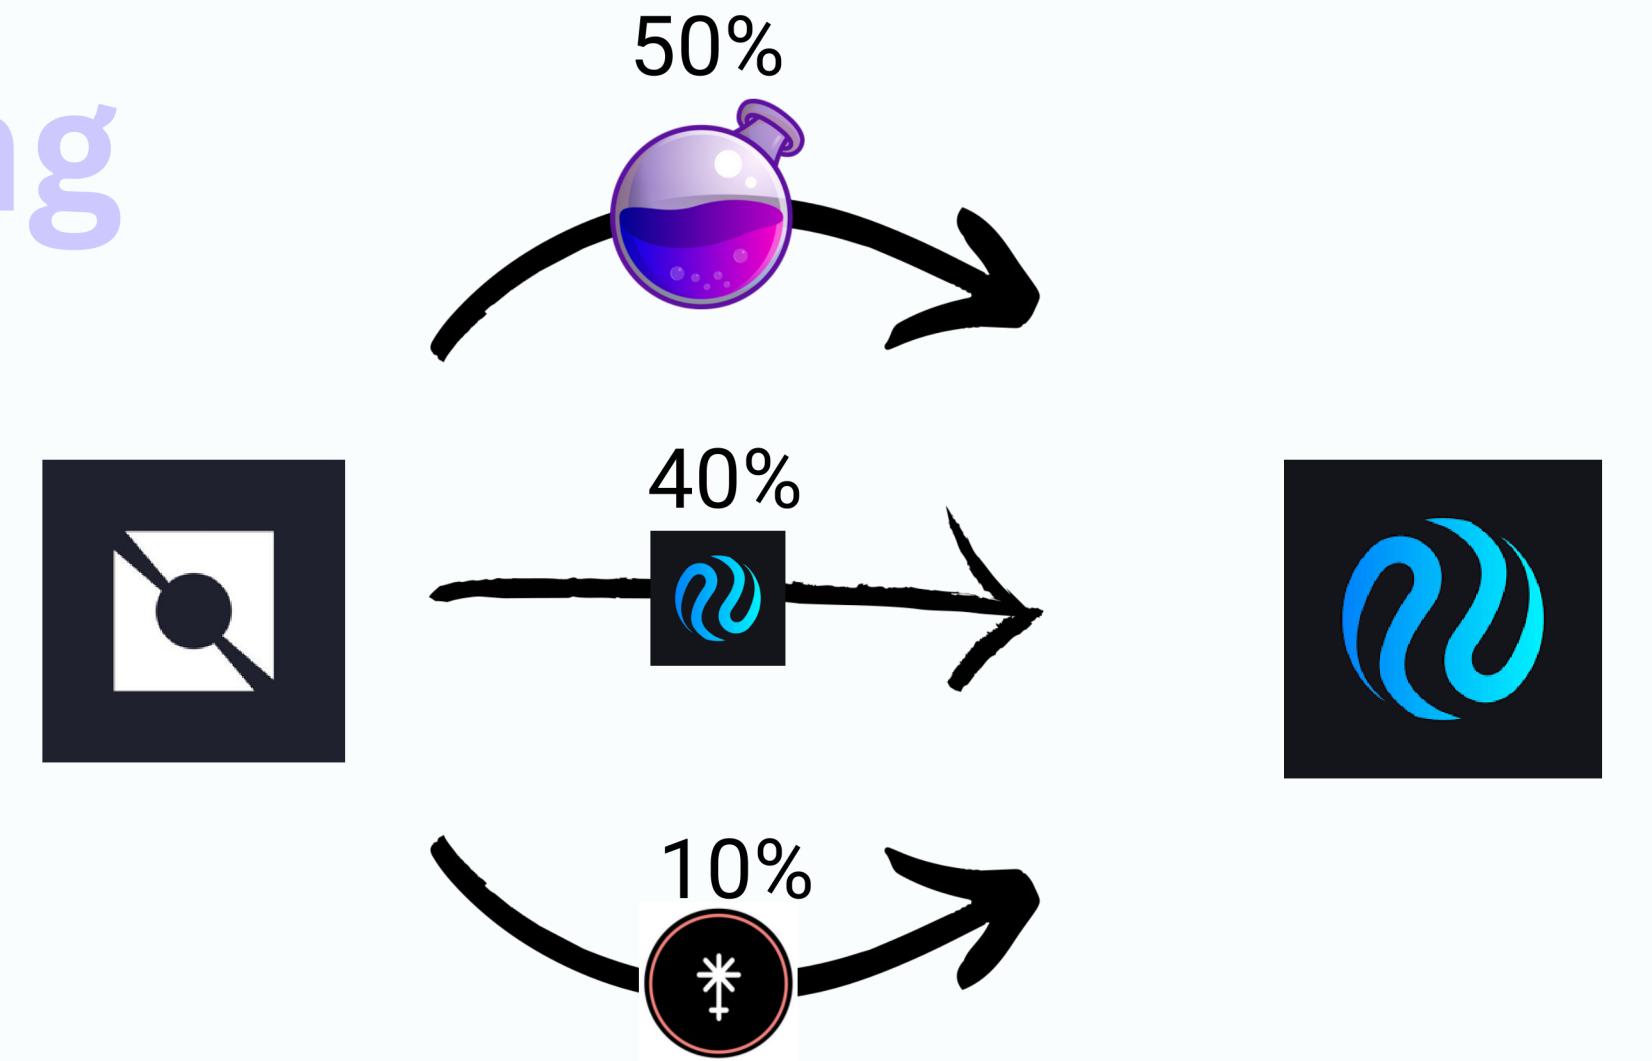

- Users need to continuously bridge to separate chains to grab their assets.
- Current aggregators present in Cosmos only aggregate assets on a single chain
- Due to this the best price the user can get on that chain is limited to the liquidity of that asset on that chain
- Or worse, if that asset is not on chain then user can't exchange that asset.

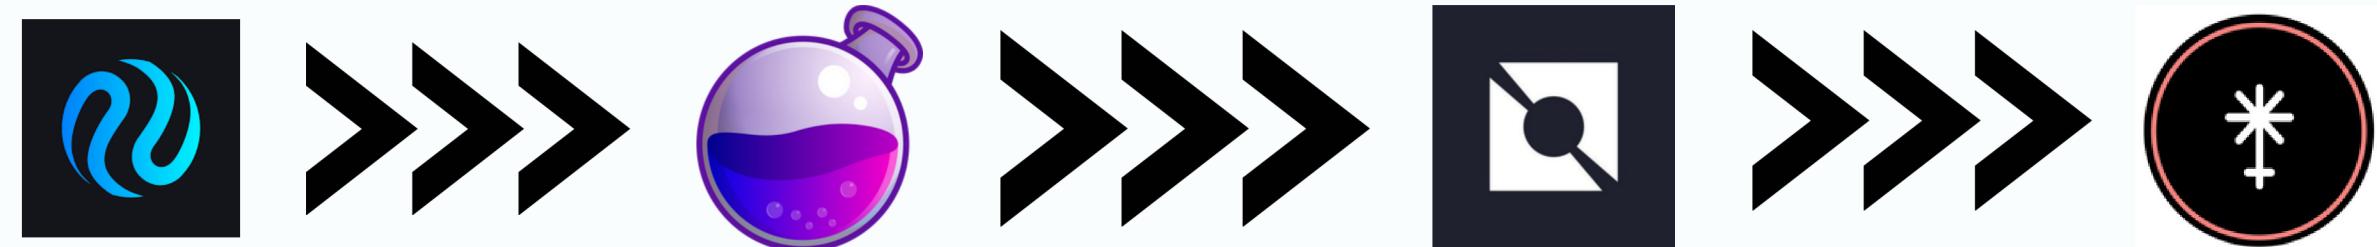

Architecture

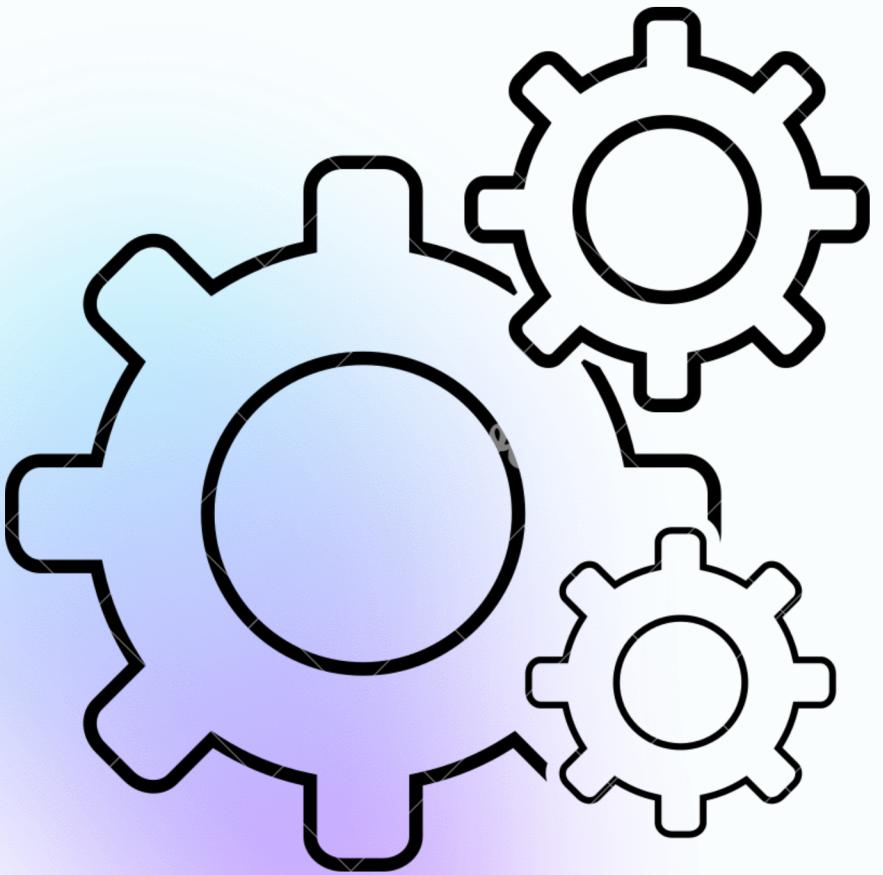

Split Routing

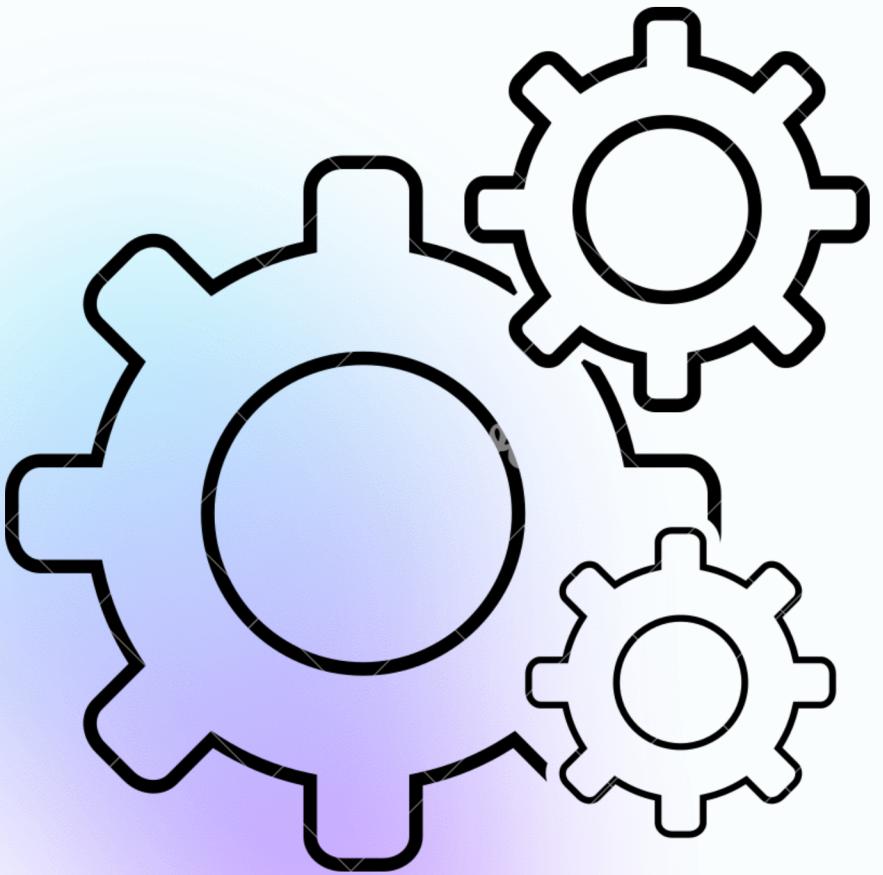

Multichain hop routing

Tech Stack

- Cosmwasm
- Relayer in Hermes
- Injective, Neutron and Osmosis
- Rust and TS

Future Scope

- Improving the SDK for better routes and prices
- Introduce multihops for multiple chains using ICS-999

Team BakaOtaku

We're done!

THANK YOU. HAVE A
GREAT DAY AHEAD.
